Portfolio: <https://seb-lucas.github.io/>
Cavite, Philippines

Professional Summary

Computer Engineering graduate with hands-on experience developing web applications, IoT systems, embedded projects, and database-driven software. Experienced with HTML, CSS, JavaScript, PHP, MySQL, Python, Node.js, Firebase, and Arduino-based development. Developed projects including a multi-role clinical appointment system, e-commerce platform, and IoT automation

Education

Bachelor of Science in Computer Engineering
Cavite State University – Cavite College of Arts and Trades
Graduated on August 26, 2026

Professional Experience

On-the-job training - James Polymers Manufacturing Corporation

- Developed and supported a product quality inspection system using the **Sentry2 Vision Sensor** to identify approved and rejected products.
- Collaborated with the technical team to integrate vision-based inspection into the company's quality assurance process.

Technical skills

Programming / Development: HTML, CSS, Node.js, MySQL, Python, JavaScript, PHP
Tools & Platforms: GitHub, Git, Visual Studio Code, Figma, Arduino IDE
Concepts: IoT, Embedded Systems Data Structures, Web Development, UI/UX Prototyping

Projects

“IoT Remote Controlled Car”- MIT App

- Designed and developed an IoT-based remote-controlled car with wireless real-time control
- Integrated embedded systems, sensors, and communication modules to enable remote operation.
- Applied programming and hardware interfacing concepts to ensure reliable performance

“High Velocity” - E-commerce web system (HTML, CSS, PHP, MySQL)

- Designed and developed a functional e-commerce website prototype for product browsing and order management.
- Integrated SQL database for product data storage and retrieval.
- Created user-friendly layouts to simulate a real online shopping experience.

“Clinical Healthcare Appointment System” – (HTML, CSS, JavaScript, PHP, MySQL)

- Developed a PHP/MySQL Clinical Appointment System for patient registration, appointment booking, scheduling, medical records, and notifications.
- Implemented role-based dashboards and workflows for Patients, Doctors, Receptionists, and Administrators.
- Built responsive interfaces with appointment management, reports, access control, and validation

Certification/s

- TESDA National Certificate II (NC II)- Computer Systems Servicing
- CompTIA- AI Essentials

Seminars

- **DICT 4A** – WiTech Batangas ASEAN Data Science Explorers Enablement Session 2024
- **GEN AI TO Z**: A Career Summit in an AI-driven World (UP Diliman)
- **Arduino Day Philippines 2026**
